MOHAMED AZIZ KHILA

COMPUTER SCIENCE GRADUATE - FULLSTACK DEVELOPER

Borj Cedria, Tunisia | khilaaziz7@gmail.com | +216 28 863 698

SUMMARY

Computer Science graduate from ISTIC with hands-on experience in fullstack web development using modern technologies. Proficient in designing and developing web applications, working with databases, and applying agile methodologies such as Scrum. Demonstrated ability to manage and deliver projects through academic and internship experiences. Eager to contribute to innovative teams and take on real-world development challenges.

PROFESSIONAL EXPERIENCE

PayPal English-Speaking Customer Service Representative, TRANSCOM **2026**

- Provided customer support for PayPal users in English, assisting customers with account access, payments, disputes, and transaction-related inquiries. Applied PayPal policies and procedures to investigate issues, deliver accurate resolutions, and ensure a high level of customer satisfaction while consistently meeting quality and productivity targets in a fast-paced environment. Successfully completed PayPal certification, demonstrating proficiency in the company's products, services, and customer support standards.

Full Stack Developer Apprentice – UIT / U4Gen **2025 - 2026**

- Developed and maintained enterprise web applications using Microsoft Power Platform, Dynamics 365, and Dataverse. Implemented business features, integrated API-based WhatsApp communication through Twilio, collaborated with cross-functional teams, and contributed to CRM customization, API integrations, and workflow automation in an agile environment.

Internship, Tunisia Smart Solutions **2024 - 2025**

- Developed a fullstack human resource management web application following the Scrum methodology and Laravel as technical choice. The platform featured dynamic role-based access control, a structured multi-level validation workflow for administrative processes, a modern and responsive user interface to enhance usability, and a real-time internal chat module to facilitate seamless communication between employees and HR personnel.

Internship, E-build **2023 - 2024**

- Developed Sport Divers; a web-based application for managing a sports complex using Laravel as development framework.

LANGUAGES

- English : Advanced (**C1 – IELTS 7.5**)
- French : Fluent
- Arabic : Native

PROJECTS

Chatbot **2024 - 2025**

- Developed an academic chatbot designed to answer questions related to Italy, leveraging a BERT-based natural language processing model for accurate understanding of user queries. The chatbot features an interactive Streamlit interface, providing a user-friendly experience for efficient and engaging information retrieval.

UniJob, Project for ISCAE Students Group (Freelance) **2025 - 2026**

- Developed a fullstack web application for linking students and employers for internships and part-time work. Students browse jobs, apply with CVs, and update profiles. Employers post jobs and manage applications. Admin approves student profiles, manages users, and oversees jobs and invoices. Includes real-time chat, notifications, PDF invoices, and role-based access. Built with Laravel, Vue.js, SQLite, and Vite, deployed on Render.

Green Exchange, Project for ISCAE Students Group (Freelance) **2025 - 2026**

- Developed a fullstack web application for trading recyclable waste materials between buyers and sellers. Features include product listings, shopping cart, wishlist, order management with admin approval, commission tracking, PDF invoice generation, notifications, multi-language support (EN/FR/AR), and role-based access control. Built with PHP, SQLite, HTML, CSS, and JavaScript, and deployed on InfinityFree.

Arenex, Personal Project **2025 - 2026**

- Developed a fullstack mobile application for football field reservations, connecting players with field owners. Features include real-time availability, reservation management, admin approval workflow, push notifications, multilingual support (EN/FR/AR), and role-based access control. Built with React Native (Expo) and PostgreSQL.

J.A.R.V.I.S., Personal AI Voice Assistant, Personal Project **2025 - 2026**

- Developing a fully local AI voice assistant in Python using Faster-Whisper, Ollama (Qwen2.5), and Piper for speech recognition, conversational AI, and text-to-speech. Designed with a modular architecture to support long-term memory, tool/function calling, and offline automation of local system tasks.

SOFT SKILLS

Effective communication | Leadership | Problem solving | Adaptability

TECHNICAL SKILLS

Laravel | Power Platform | JAVA | Python | SQL

EDUCATION

Bachelor of Computer Science **2022 - 2025**
The Higher Institute of Information Technologies and Communication (ISTIC)

Baccalaureate in Experimental Sciences **2021 - 2022**
Borj Cedria High School
